

DRUM STINGER ADAPTER

velcon
CANADA

The drum adapter requires no threading into the drum bung. Simply drop the adapter in and pull it out when finished. The adapter will keep the stinger pipe straight and level in the drum and off the drum bottom to facilitate fuel bottoms not being pumped and also protecting drum lining on lined drums.

For electric pump/filter assemblies, the adapter incorporates a quick release locking pin.

- Light weight aluminum construction
- Incorporates a 1" stinger pipe (other sizes available)
- Use with suction hose feed lines, rotary hand pumps, electric pump/filter assemblies
- Part number 990485 basic adapter
- Part number 990485A with locking pin
